

THE UNIQUE COMPREHENSIVE CYBER SECURITY COMPETENCIES FROM FINLAND!

Partnership with Cyberwatch Finland, Soprano Plc and Claned Group

The Winning Concept for Your Cyber Policy

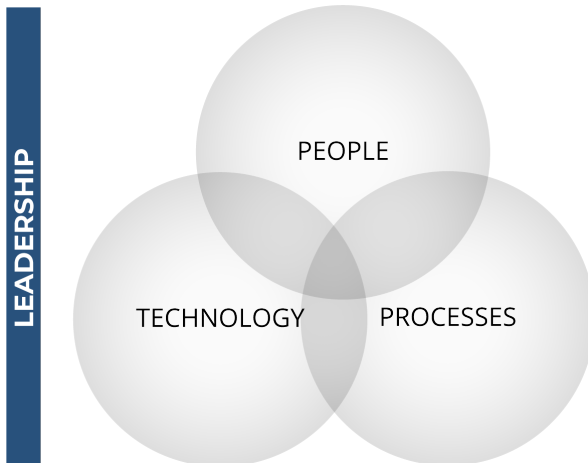

ENSURING CYBER SECURITY IS A COMPLEX TASK

It is the sum of many contributing factors: technology, processes and procedures, as well as people and leadership. All these components are of crucial importance. Establishing cyber security requires a sustained commitment to learning, training and good practises. Cyber security is also demanding, because the threat landscape is constantly evolving as our societies and economies are transformed by the rapid pace of digitalization. Criminals and other malicious actors are continually trying to exploit cyber vulnerabilities that leave governments, companies, organisations and individuals open to attack, data theft and manipulation. Therefore, maintaining effective cyber security is an ongoing challenge for all states, companies and organisations of different sizes.

COMPREHENSIVE CYBER SECURITY

We help your organization to understand the big picture as well as the details, so you can make the right decisions concerning cyber security.

We offer trusted Finnish strategic and technological cyber security know-how, pedagogic excellence and e-learning expertise – a comprehensive, world-class solution for the cyber security needs of your organization.

An organization is only as strong and trustworthy as its weakest link. In fact, most cyber vulnerabilities are attributable to insider risk which squarely depends on the knowledge level and behaviour of your own staff. That is why it is crucial to establish risk awareness, best practices and vulnerability management at all levels of your organization. Develop your cyber resilience, don't be an easy target!

SERVICES

We offer a unique package that helps you to upgrade your organization's cyber security and face the modern threats of the cyber world. We bring together Finnish cyber security strategic, technological, pedagogy and e-learning expertise under one roof in collaboration with our highly qualified partners.

CYBERWATCH FINLAND THEME REPORTS

Deeper analysis of specific themes, business sectors or important topics. Theme Reports can be ordered on a case-by-case basis when the need arises.

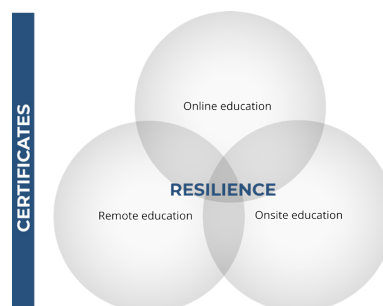

CYBERWATCH FINLAND REVIEWS & CONSULTING

Monthly and Quarterly Reviews, where the most significant threats and security breaches are analysed throughout each period. The reviews help to combat and forecast emerging themes and threats that organizations are facing.

TECHNOLOGICAL SKILLS

We support our customers on building resilient IT infrastructure through services and technical solutions. Our approach helps identifying both technical and process weaknesses on critical infrastructure.

ONSITE, REMOTE AND ONLINE TRAINING

Design of the onsite, remote, and online cyber security training programs are tailored for your executives and employees. Trainings facilitate learning and awareness of cyber security threats and practices.

PARTNERSHIP

CYBERWATCH FINLAND

Cyberwatch Finland offers strategic situational awareness, training and consultations for the decision makers both at the private sector and at the government side. The goal is to bring real value to decision makers, enabling leaders to apply their know-how into company's strategy to create a robust cyber security foundation.
